Early detection causes less damage.

Reduces the human work stress.

Later detection leads to heavy loss. How to implement this feature?

Damage can be reduced easily.

Disaster can be avoided.

**Thinks** 

Our project is cost efficient

Can cover wide networks of area.

Says

Does

Feels

Very easy to manage. It works
much
better than
drones.

Man made drones were used. Cost of maintenance is high.

Human source will not be enough.

Most wanted idea to implement.

Comfortable and easy to access.

Cameres were used to detect forest fires.
